

### In This Issue

In this issue of ATF, we compare 3 unique electronic key and lock system that has been the buzz among Facilities and Security Managers.

[SALTO: One Card. One Technology. Unlimited Possibilities.](#)

[CyberLock: Intelligent Access on Demand](#)

[iLOQ: The Key to "Greener" Security](#)

### About Us

With over 30 years of focus on security in Asia, ADEMCO is synonymous with innovative solutions and an established service infrastructure.

We are committed to supporting our customers in meeting the dynamic challenges of security in Asia, developing unique security insights across different industries and providing long term, sustainable support to our valued customers.

### SALTO: One Card. One Technology. Unlimited Possibilities.

SALTO battery-powered wire-free lock system brings you a smarter, secure and innovative way of access control.

#### Benefits:

- Card/token-based that can be conveniently carried around
- Wire-free and aesthetically designed means no messy drilling and expensive cabling
- Easy integration into existing systems
- Different levels of security control
- Simple control of all doors via PC
- Communication through SALTO's unique Virtual Network
- Scalability and lowered cost of ownership: Up to 50% cost savings over time

#### Where is SALTO used?

- Commercial Buildings, Museums, Schools, Hotels, Hospitals, Airports, High-security Government buildings
- From 4 doors to 64,000 doors; from several users to thousands of users
- Replace traditional card access for non- high-security areas
- Flexibility of scaling without skyrocketing costs

### CyberLock: Intelligent Access on Demand

Aging master key system? Losing security and unable to track lost keys? No control over key duplication?

CyberLock is an innovative and fully electronic lock system that easily converts existing mechanical locks into a powerful access control system.

#### Benefits:

- Electronic cylinders simply replaces your existing standard mechanical cylinders
- No wiring or battery is required at the lock
- Locks cannot be picked and keys cannot be duplicated
- You determine which key opens which lock, and when
- Expiration of keys can be set for added security, e.g. daily, weekly, monthly
- Intelligent key contains a list of locks it can open, with days and times for each individual
- A record of all events is stored in both the locks and keys
- Users only need to hold one key
- Weather resistant - works even in harsh, outdoor environments
- Up to 30% cost savings over time – no need to change out entire lock system or re-key due to changed or lost keys

### Where is CyberLock used?

- Utilities, Public Facilities, Remote Facilities, Cabinets, Armories, Risers, Pump Rooms, Elevators, Escalators
- Kiosks (ATMs, e-payment, etc), Vending Machines
- Equipment/Server Racks, Safes, Cash Drawers
- High-Value Cage, Containers and Freight Trucks
- Padlocks and Gates
- Anywhere with requirement for many locks but limited user access

### iLOQ: The Key to "Greener" Security

The iLOQ electronic locking solution is a unique, patented, fully electronic and 100% power-free locking solution.

There is no more fear of lost or duplicated keys; and expensive change-outs. iLOQ allows you to decide which key opens which door, while retaining audit of who opened which door and when!

#### Benefits:

- Upgrade security - Replace mechanical locks and keys with high-security encrypted ones that cannot be copied
- No mechanical cut - Unlike traditional keys, it cannot be mechanically duplicated
- No Re-keying – No lengthy wait for new cut keys. New keys can be reprogrammed on the spot
- Easy installation and maintenance - No batteries or cables needed, no downtime
- Blacklisting of lost keys - Other keys & locks need not be changed nor reprogrammed. Enormous savings!
- Convenience – One Person, One Key, Multiple Access
- No batteries at all! No wires! No changing out cylinders!

### Where is iLOQ used?

- Private Residences, Condominiums, Hostels
- Remote Sites, Padlocks, Utility Rooms...etc.
- Facilities requiring a large number of key holders with secured and controlled individual user access

There are no solutions in the market today that is comparable to the iLOQ solution. [Contact us](#) today to find out more!
