

### In This Issue

The **compact, fully-portable Brijot MobileScan™ Millimeter Wave (MMW) security scanner** quickly detects metal and non-metallic objects hidden under clothing, without intruding on privacy.

### Brijot MobileScan™ See what they are hiding.

Is it possible to screen everyone that enters – or exits – your facility, without bringing your operations to a virtual halt?

Be it **plastic explosives and weapons, hidden liquids/gels, contraband, cash, electronics, wood, bottles of liquor, fresh/frozen foods**, or other items - Brijot MMW whole body imaging solution is effective and available NOW to fill the technology gap.

#### Feature highlights:

- **Quick** – Automated detection in as little as 0.5 seconds
- **Discrete** – No anatomical details and no intrusive pat downs
- **Safe** – No harmful exposure to radiation or energy
- **Compact** – Completely mobile and can be battery-operated
- **Easy to use** – Self-contained unit requires minimal training and operational in seconds

#### Where is Brijot used?

- Airport and Transportation Hubs
- Government Buildings and Offices
- Hotels, Stadiums and Major Events
- Factory, Warehouses
- Jewelry and High-Value Goods

Unlike other conventional scanners that are limited to detecting only metal objects and is very intrusive, the **Brijot MobileScan** solution is ideal for personnel screening where throughput and privacy are important.
