About Us

With over 30 years of focus on security in Asia, ADEMCO is synonymous with innovative solutions and an established service infrastructure.

We are committed to supporting our customers in meeting the dynamic

AMAG's New Generation of IP Cameras Comes with in-built Video Content Analytics

AMAG Technologies introduced a new generation of network video products which integrates in-camera processing for:

- Megapixel video
- H.264 compression
- Basic Video Content Analytics

Systems save up to 50 percent of storage and network bandwidth compared to MPEG-4 compression and up to 80 percent compared to MJPEG.

This allows for more cost-effective video surveillance systems and simplified deployment and management of large-scale video systems.

AMAG and SALTO Revolutionize Security Secure more doors at an affordable price

AMAG's Symmetry Security Management System now integrates with SALTO's electronic locks and its virtual network application to provide access control for an entire building or campus at an economical price.

The change in technology has blurred the line that separated access control from locks, opening a whole new opportunity to existing AMAG users.

Existing AMAG users will be able to secure a larger number of internal doors now with the more affordable wire-free option. The locks operate in a wire-free environment so no hard wiring or wireless infrastructure is necessary.

challenges of security in Asia, developing unique security insights across different industries and providing long term, sustainable support to our valued customers.

Installation is fast, self-contained and costs a fraction of the price of a normal secured door. The solution is so versatile and inexpensive that anyone who learns this is available will want it!

Lenel Mobile Monitoring Application For BlackBerry Smartphones

Lenel's Mobile Monitoring Application for BlackBerry® smartphones allows security personnel to review and receive alarms while on patrol, as well as run reports against user transactions directly from a BlackBerry smartphone.

This application has been presented with a Wireless Leadership Award at this year's BlackBerry Wireless Enterprise Symposium (WES) in Orlando.

[Contact us](#) today for more information on the mobile monitoring application from Lenel.

ADEMCO Guards Division Saving costs for your business

Ademco Guards Division has been providing guarding services to businesses and governments since 2000. **Our guards have achieved the SIRD Grade A since 1 December 2009** and we have been consistently hiring highly qualified and responsible security personnel, carefully screened and selected to comply with requirements set by the Singapore Police Force.

In addition to security manpower, **Ademco also offers managed security services, where customers outsource to us the entire running of their security system operations and manpower, while maintaining only essential internal security management headcount.**

[Contact us](#) today for your guarding services needs.

Case Study: AIA

AIA opened its newly refurbished AIA Customer Service Centre at 1 Finlayson Green in April 2010, providing greater comfort and convenience for customers.

A newly added feature is the self-service terminals where customers are able to do transactions such as fund switches and apply for policy loans as well as access their policy information.

Ademco is proud to be the security systems provider for their new centre.

Case Study: Owens Corning

Owens Corning engaged Ademco to safeguard their facility, which produces platinum bushing for fiberglass production.

In this highly-secured facility, various security measures were implemented such as a metal weight detecting access control system, intrusion detection system, and CCTV. Other services include fire protection and DECAMS monitoring services.

Case Study: Allied World Assurance Company (AWAC)

Ademco now secures Allied World Assurance Company (AWAC) at the iconic One George Street building.

The office was secured with an integrated access control system, IP cameras with intelligent video surveillance, as well as Intrusion Detection System with Ademco 24hours Central Alarms Monitoring.

Commendation: Amazon

Ademco received a commendation from the Amazon team for our relentless on-site and after-sales support for one of their projects.

Kudos to the Ademco Technical Team for their effort!

Commendation: HDB (Pinnacle @Duxton)

Pinnacle @Duxton recently held a balloting exercise for public access to the Skybridge on National Day for fireworks viewing. The event was featured on the news, where members of the public enjoyed the fireworks together with residents.

Source: ST, Alphonsus Cheri

This is the first of its kind in Singapore and Ademco is proud to be the appointed Managing Agent. We provided managed security services - from the running of their security systems operations, to manpower. We also developed the website for public balloting of access to the Skybridge for special events!

Ademco received a commendation from HDB thanking our committed team members for their great help in making this a successful event for all!

Intrusion Detection System or CCTV?

Thousands of laptops were stolen from a private contractor for U.S. Special Operations Command, during a break-in. The heist was captured on CCTV, where up to 7 people spent 9 hours loading thousands of Panasonic Toughbook laptops and other equipment onto 2 semitrailer trucks! **See the full story [here](#).** (source: *Tampabay.com*)

Would this have happened if an Intrusion Detection System (IDS) instead of just CCTV had been in place?

[Contact us](#) today to find out how **IDS and 24hrs Monitoring Service can help secure your business.**
