

Ademco Tech Flash

Cost-Effective, Flexible and Fully Secured Locking Solution for Schools July 2010

In this issue

KEY issues faced by schools and educational institutions...

- No control over key duplication/distribution
- Unauthorized visitors using campus facilities
- No option/expensive to expand/integrate existing system
- Expensive cabling and infrastructure cost

SALTO

One Key. One Technology.

Whether you manage a small, private institution or a large campus, or whether you need to control 6 doors or 600 doors, you need an access control partner you can rely on.

SALTO wire-free lock system brings you a 'one-stop' solution to a smarter, secure and cost-effective way of access control.

Benefits:

- Users only need to hold one card
- Card/token-based are convenient to carry
- Wire-free means no drilling and cabling
- Aesthetically designed
- You determine which key opens which lock, and when
- Expiration of keys can be set for added security
- Blacklisting of lost keys - need not replace locks
- An auditable trail of all events
- Easy integration into existing systems
- Flexibility of scaling cost-effectively
- Up to 60% savings (vs. traditional systems)

Where is Salto used?

- Schools, Universities, Private Institutions
- Hostels and Dormitories
- Equipment/Server Racks
- Cabinets, Lockers, Kiosks
- Risers, Facility Rooms
- Padlocks and Gates
- Classrooms, Principal's and Administration office

Contact us today to find out more on the possibilities of the SALTO system!
